

About CBA Seminars

The CBA Education Committee presents free seminar series for our new and advancing members. We offer 3 series, each tailored to appropriate learning goals:

- 1) 0-20 Seminar Series Saturdays Afternoons
- 2) 99'er Seminar Series Tuesday Evenings
- 3) NLM Seminar Series Monday Evenings

Our goal is to support bridge learning in a fun, informal environment. Each series introduces level-appropriate standard topics in 20 minute discussions. The CBA Seminars aim to help you be proficient at your current level, and become ready & comfortable to play at the next level, according to your own pace and interest. The seminar series are published on the web with lecture materials in advance so you can learn at your own speed. Each seminar exposes a topic for you to explore in depth through other sources.

CBA Life Masters will lead the seminars. You will benefit from their depth of experience and breadth of approaches to our great game. CBA seminars are a great opportunity to meet experienced players and get your questions answered.

The CBA Education Committee screens content to ensure materials are appropriate, relevant and sound. We strongly recommend existing published information from proven sources. We make no recommendation regarding one method or approach over another. We strongly urge you to explore the many options available to you.

We recognize that everyone learns in different ways and that we all have different goals. Whether you are looking to have more fun at the club or striving to play National tournaments successfully, we support your learning goals. You can improve your game at the CBA with web content, free seminars, the CBA library, mentor/mentee games and paid classes.

We hope you find these seminars a fun part of your bridge experience at the CBA. If you do, be sure to let us know.

Spread the work among your friends. Come for a seminar and stay to play!

Sincerely,
The CBA Education Committee:
